

Yuken India Limited – Details of Business

Yuken India Limited (YIL) is a leading Indian manufacturer and supplier of oil hydraulic equipment and systems, established in 1976 in technical and financial collaboration with Yuken Kogyo Company Limited, Japan (YKC) — a global leader in hydraulic technology.

About the Company

- Name: Yuken India Limited
- Founded: 1976
- Headquarters: Bengaluru (Bangalore), India
- Registered Office: Doddanekundi Industrial Area, Mahadevapura Post, Bengaluru
- Manufacturing Facility: Malur, Kolar District, Karnataka

Yuken India is a publicly listed company with a strong track record of quality, innovation, and customer service. It carries the rich engineering heritage and technological backing of Yuken Kogyo Co., Ltd. of Japan, which holds a significant share in the company.

Vision & Strengths

Yuken India is recognized for:

- High-quality hydraulic products engineered for industrial, mobile, and specialized applications.
- ISO-9001:2015 certification across its manufacturing facilities.
- Wide national and international distribution network and strong after-sales support.
- Trusted partnerships with leading OEMs across sectors such as automotive, machine tools, power, construction, steel, and defence.

Core Business & Products

Yuken India designs, manufactures, and markets a comprehensive range of hydraulic components and systems, including:

Hydraulic Components

- Hydraulic Pumps: Vane, piston, gear, and variable displacement pumps
- Valves: Directional, pressure, flow, proportional, servo, modular, and logic valves
- Cylinders: Customized industrial hydraulic cylinders
- Accumulators & Accessories: Hydraulic accumulators, flanges, fittings, and other components.

Hydraulic Systems

- Hydraulic Power Packs: Engineered power units for machine tools, presses, and industrial applications
- Integrated Hydraulic Systems: Custom hydraulic solutions for steel mills, construction machinery, mobile equipment, and special applications

Foundry & Precision Castings

To ensure quality and supply chain agility, Yuken India operates a world-class foundry producing precision castings, essential for hydraulic components.

Strategic Partnerships & Joint Ventures

- Yuken Kogyo Company Limited, Japan: Long-standing technical and financial collaboration since inception, bringing advanced hydraulic technology to India.
- Sai India Limited: Joint venture with SAI Spa (Italy) for high-torque hydraulic motors — a leader in radial piston motor manufacturing.

Industry Presence & Clients

Yuken India serves diverse sectors including:

- Automotive & Transport
- Machine Tools & Capital Goods
- Construction & Earth-moving Equipment
- Steel & Heavy Industries
- Power Generation
- Defence & Aerospace

Its products are widely used by major original equipment manufacturers (OEMs) and system integrators across India and abroad.

Quality & Certifications

Yuken India upholds rigorous quality standards and continuous improvement under ISO-9001:2015 certification, ensuring high reliability, performance, and long service life of its hydraulic products.

About Yuken Kogyo Company Limited (Japan)

Yuken Kogyo Co., Ltd. is the Japanese parent and technological partner of Yuken India. Founded in 1929 and headquartered in Kanagawa, Japan, Yuken Kogyo is a global leader in hydraulic engineering. The company develops, manufactures, and markets hydraulic pumps, motors, valves, cylinders, and complete system solutions — serving industrial machinery, mobile applications, and environmental machinery sectors worldwide.
