

Design Number and special standard suffixes to product made by Yuken India Limited

In response to queries from various customers and stakeholders this note is relevant to share the convention/practice at Yuken India on design numbers and their suffixes.

1. Design numbers are assigned for the purpose of according a means of traceability to the product's performance and features. They are always denoted by the last few* digits of the model code designation and are typically, but not always limited to two digit numbers.
2. Design numbers for any product are subject to change from x0 to x9, but installation dimensions shall remain common for the series mentioned.
i.e – basic installation dimensions for PVR1T*20 or PVR1T*29 will remain same.
3. Design standard typically refers to minor changes in the installation within a given design. This is represented by the third and fourth digits of the design number. A design standard may or may not be applicable to a given product.

Eg: PVR1T*20 will have dimensions and features deemed to be introduced as a general Yuken standard (taper thread).
But, PVR1T*2080 will have porting common to the European continent (i.e - BSPF thread)

4. In addition to the above, design number and the design standard, products made in Yuken India may have additional suffixes starting with H** (H-series).

Regd. Office: P.B. No. 16, Whitefield Road, Whitefield, Bangalore - 560 066

Phone: 080 – 2845 2069

Fax: 080 – 2845 2069

E-mail: marketing@yukenindia.com Website: www.yukenindia.com

5. Products with H-series codes could be used to denote minor changes in the product due to,
 - a. Indigenization
 - b. Customer specific customized features
 - c. Application specific customized features
6. In some cases, the H-series variants have become the de-facto standard for the Indian market and these are reflected in the standard catalog available on the Yuken website/printed material. Eg: MR*-01*30H16.
7. ALWAYS refer the Yuken India website for the latest catalogs. The product variant reflected in the Yuken catalogs on the website (regardless of the design number, standard and H-series code) are the default variants supplied by Yuken India Limited. Please note, that for obvious reasons printed versions are not subject to update until the next reprint.
8. PLEASE CONSULT YUKEN INDIA IN CASE OF DOUBTS ON THE DESIGN NUMBER/STANDARD OR SPECIAL FEATURE OF THE PRODUCT. DO NOT ASSUME.
