

Supply of Parison Controller to be discontinued

Specifications

| Monitor Output Voltage | Power Supply | Power Consumption | Ambient Temperature | Interpolation Points | Sensor Resolving Feature |
|------------------------|--------------------|-------------------|---------------------|--------------------------|--------------------------|
| 0-10V DC | 24 V DC 220V AC | Less than 20 VA | 0-50 C | 256 linear interpolation | 0.05% |

We would like to notify that we will not be accepting any new orders for the Parison controllers from Yuken and will be discontinuing this model. We will try our best to support existing installations with spares and service.

Parison Controller set the benchmark in blow molding machines many many years ago. However, sales volumes have dwindled in recent years and it is time to retire this old horse.

A warm thanks to our customers that have been using it till now.
