

## Release of New Product – SVG-01

We are happy to announce the release of our new product, SVG valve, a manual operated stop valve.

Model Numbers	Rated Flow L/min.	Max. Operating Press. Kgf/cm <sup>2</sup>	Mass Kg.
SVG-01-10	100	250	2.6

This gasket mounted valve suitable for use with sub-plates and manifolds will prevent/throttle the flow of oil in either direction when closed.

Inline valves are popularly used for the same function. But, leakages from threads are a constant complaint. Gasket mounting/Manifold mounting of valves decreases the number of such leakage points and also contributes to de-skill the manufacture of Hydraulic Power Unit by reducing piping work.
